March 26, 2017

Prof. Govind Joseph, Chairpersons

Organising Chairperson, GATE 2017 on behalf of IITB-GATE for INHRD

The GATE 2017 score is calculated using the formula

$$GATE\ Score = S_q + (S_t - S_q) \frac{(M - M_q)}{(R_t - M_q)}$$

where,

M is the marks obtained by the candidate in the paper mentioned on this score card in GATE 2017

M_q is the qualifying marks for general category candidate in the paper

R_t is the mean of marks of top 0.1% or top 10 (whichever is larger) of the candidates who appeared in the paper (in case of multi-session papers including all sessions)

$S_t = 350$, is the score assigned to M_t

$S_q = 900$, is the score assigned to M_q

In the GATE 2017 score formula, M_t is usually 25 marks (out of 100) or $\mu + \sigma$, whichever is greater. Here μ is the mean and σ is the standard deviation of marks of all the candidates who appeared in the paper.

Qualifying in GATE 2017 does not guarantee either an admission to a post graduate program or a scholarship/assistantship.

Admitting Institutes may conduct further tests and interviews for final selection.
